EXPERIENCE

QA Automation Engineer, Assoc.
Code42 Software Inc.

Oct 2016 - Present
Minneapolis, MN

- Development of QA Automated testing framework for CrashPlan (crashplan.com)
- Collaborated across multiple scrum teams to ensure complete coverage of features
- Assisted CI/CD teams to track down issues throughout the Jenkins build processes
- Trained manual testers in the best practices of using Cucumber for web page testing
- Worked directly with developers to provide QA coverage before feature completion
- Responsible for deciding which areas of QA testing would be manual vs automated

Undergraduate IT Assistant
Minnesota Population Center

Sept 2014 - May 2016
University of Minnesota - TC

- Web Application Development with Ruby on Rails for Terra Populus (terrapop.org)
- Worked with the full stack building a supporting internal data management Web App
- Established a new automated testing system for unit and system testing with RSpec

Student Web Developer
College of Education & Human Development

Oct 2013 - August 2014
University of Minnesota - TC

- Web Development with Ruby on Rails for CEHD on Video Ant (ant.umn.edu)
- Trained in RESTful front end development with MVC patterns & defensive design
- Integration with 3rd-party APIs for authentication (eg. Facebook, Google, Twitter)

EDUCATION

Bachelor of Science in Computer Science
GPA: 3.2

University of Minnesota - Twin Cities
May 2016
